

Risk Manager (RSK)

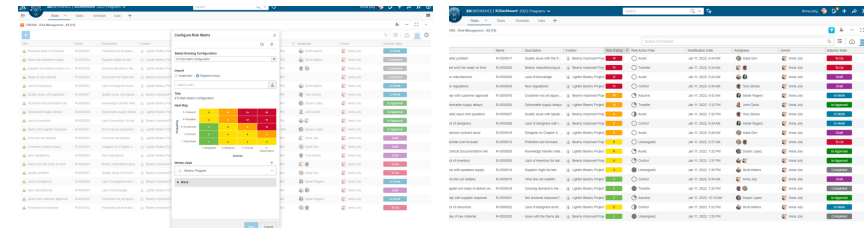

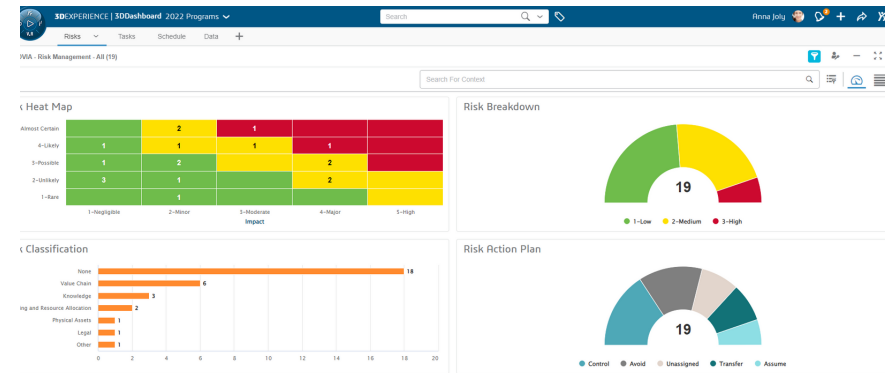

Allow organizations to reach stronger performance, increased resilience, better assurance, and compliance through scalable Risk management.

Risk management is a continuous process of identifying, analyzing, and responding to risk factors throughout the life of a project and in the best interests of its objectives.

This role allows business users to manage risks from identification to resolution by creating risks, capturing risks details, assigning risks to users, tracking the mitigation process and re-assessing the risks until their impact and probability are acceptable.

Benefits

- Standardized Risk assessment across the enterprise beyond project management
- Mitigate risk collaboratively with projects and tasks
- Support industry standards through Risk matrix configuration and ad hoc taxonomies
- Make better decisions based on real-time and data-driven Risk indicators

Highlights

- Configure the Risk Matrix
- Create new risks
- Working with risk context
- Add Affected Items to risk
- Attach documents to risk
- Assign members to risk
- Classify the risk
- Manage Risk Rating and view Risk Trend
- Manage Risk Action Plan
- Filter risks
